

# Family engagement : everyone has a part to play

A **parent** gets to know their child's teacher and the learning happening at school; creates a learning space at home and makes learning enjoyable; talks with their child about their future and makes plans.

A **student** helps their family and teacher get to know each other; talks with their family about learning at school; talks to their teacher about learning at home; talks with their family about their hopes and dreams.

A **teacher** reaches out and gets to know families; helps families understand learning at school; finds out about students learning at home; provides activities students can do at home with their families.

A **school leader** creates a welcoming and inclusive environment; knows and understands the community; strengthens ties with families and community; supports teachers to engage parents.
